## Customer Reviews

2015-08-12 So I'm a beginner at suspension training, and started out with this fun device to get stronger for rock climbing in particular, which I'm also a beginner at. (I'm a forty something tall gal) So far I've done a bunch of the stretches only - the exercises and the descriptions really excellent. Can't wait to get into the workouts, which look great. Generally the Kindle version is fantastic - the table of contents is detailed enough, the photos are great and the instructions are easy to follow. Leung comes across as a sensible and patient person I'd like to meet, me who cannot do a 'real' push up yet. Some of the exercises I can do already, others I think I have to get stronger before trying the beginner version. HOWEVER A note about the Kindle version on windows phone 8.1 though.... So far I'm still using the short videos from Lifeline USA for their Jungle Gym XT trainer to

get a 30min full body workout that kicks butt. The reason I've not started the full body or general workouts from this book yet is the impossibility of easily flipping from a workout that just LISTS the exercises through to each exercise's (excellent) black and white photos and descriptions. Really??? Each workout, example legs / arms & shoulders / core, already lists the exercises to do, number of reps / duration and page numbers(!) on the Kindle version. The Kindle version should be changed to show a jump link in the workout to each exercise AND at the end of each exercise there should be a jump link back to each workout that used that exercise. Then you can actually USE the workout regimes in this book's kindle version on a mobile phone, which is the most convenient way to refer to the book. For those with better memories this may not be such a big deal.
