Customer Reviews

Patricia Class does a very good job of introducing the MTHFR gene issue and gives people an opportunity to explore various recipes that could help with navigating the do's and don't's of food choices. I appreciate that someone has actually taken this issue on and gives people some choices on what to make to improve their health. I may not use all of the recipes in this cookbook, but I think it's good to give people options. Great price and a well written book! Good Job Patricia. :)

Not enough information but kuddos for creating a book about this widely ignored issue
