Erasmus, Man Of Letters: The Construction Of Charisma In Print

Synopsis

The name Erasmus of Rotterdam conjures up a golden age of scholarly integrity and the disinterested pursuit of knowledge, when learning could command public admiration without the need for authorial self-promotion. Lisa Jardine, however, shows that Erasmus self-consciously created his own reputation as the central figure of the European intellectual world. Erasmus himself--the historical as opposed to the figural individual--was a brilliant, maverick innovator, who achieved little formal academic recognition in his own lifetime. What Jardine offers here is not only a fascinating study of Erasmus but also a bold account of a key moment in Western history, a time when it first became possible to believe in the existence of something that could be designated "European thought."

Among the outstanding figures of the Renaissance era was Desiderius Erasmus. A skilled classicist who edited the Greek New Testament that ultimately served as the reference text in the translation efforts for the King Johnâ TMs Bible, he also coined many of the adages now in common parlance. He corresponded with many of the leading men of his day, including Thomas More, Martin Luther, and a number of popes. With Erasmus, scholars of the Renaissance had an individual who seemed removed from the strife of his own times, scholarly yet worldly, intelligent but commonsensical. An interesting book by Lisa Jardine, Erasmus, Man of Letters: The Construction of Charisma in Print,

was recently reissued in an affordable paperback format and makes a compelling argument that this portrayal of Erasmus is one he consciously crafted for himself. It should be clear this book is not a critique of Erasmus in the negative sense. Ms. Jardine clearly admires the Dutch humanist and is impressed by his scholarly efforts. Erasmus in his own lifetime, however, received relatively little academic recognition. After an early teaching position while still a monk, he never again served as a professor. To compensate for the lack of an academic pedigree, he and close friends engaged in heavy correspondence, taking the first drafts for personal reference and later using the edited versions as literary epistles. In this sense, Erasmus cast himself in the mold of the religious figure he admired most, St. Jerome. He would occasionally publish reviews of his own works anonymously (or help guide the reviews of others) in order to gain favorable publicity. The students he mentored, often among the brightest figures in Europe, served as apostles to future generations of Erasmus's talent long after he died.
