If you are worried and wondering if you would be ever getting rid of those irritating parasites binging on your blood, this book will bring with it a lot of relief. The book helps you understand what it's all about and helps overcome unnecessary fear that grips a person once he is overtaken by these parasites. This book teaches you exactly what needs to be done by keeping it really simple !

My nephews and nieces are perpetually scared of lice, since some of their friends have it. This book is a great source of information about what causes lice and how they grow so much. I was surprised to know lice are parasites and they feed off the host body. I was impressed by some of the organic treatments suggested by the author in this book, like almond oil and olive oil treatment, which is used to suffocate the lice and prevent them from breathing. The vinegar treatment was interesting too, since it aims at killing the lice. What was also new for me was the disinfecting process of the house.

Great guide to get rid of Lice fast! Having Lice in your home is probably one of the most scary things that can happen to humans, it's also very unhealthy! But this is such a great book which gives a great guide to understanding what causes Lice to stay in your home, how to get rid of it using home remedies, as well as when to call a professional Lice remover. Definitely read this one, so you can prevent your home being taken over by these creatures!!
