Customer Reviews

This book is an extremely thorough with regards to the steps needed to choose, measure, and make curtains for a variety of windows and in a large number of styles. I was very impressed to see the amount of information provided. The book is broken into seven chapters: 1) Window Dressings â Anatomy of a Window; Window Treatments defined 2) From the Top Down â Fixtures and Hardware; Heading Styles 3) Fabrics, Lengths, and Linings â Choosing Your Fabric; Classic Curtain Lengths; Types of Lining 4) Measuring Up â Taking Accurate Measurements; Structural Elements of Curtains 5) Calculating Yardage â Curtain Fullness; Curtain Width; Curtain Length; Matching Pattern Repeats 6) A Few Basic Techniques â Terms and Tips; Adding Lining 7) Sewing Your Curtains â Unlined Rod Pocket Curtains; Line Rod Pocket Curtains; Tab Top and Tie Top Curtains; Hidden Tab Curtains; Grommet Top Curtains; Instant No-Sew Curtains; Fabric

TiebacksThe author has also included a metric conversion chart and standard equivalents. While it is something that I don't particularly need, I think it is a good and useful chart to have in the book for those who use the metric system instead of the imperial system of measurements. Where it is a little lacking is that the illustrations are all hand-drawn versus any photographs. I really appreciate the amount of work and the information provided in the hand-drawn charts. The information is all extremely useful and, for the most part, would have been impossible to include properly in a photograph. However, I would have liked to have seen some real life representations of curtains that were made utilizing the author's suggestions.
