Synopsis

The NABCEP PV Installation Professional Exam is the gold standard certification exam for PV professionals and is famously difficult to pass. This book will provide test-taking strategy that can be used to most effectively study for and pass the exam. Code and theory is explained in the first half and will prove as useful background for the heart of the book which consists of practice exam questions and detailed explanations of the answers. It also contains essential strategy tools, short term memory tips and recommended reading which will be invaluable for anyone studying for the exam. The material in this book is not limited to those taking the exam as it will also be, more broadly, important for career progression and helping the reader to work safely with code compliant PV systems.

This book is very informative and a must have for any one interested in solar. I didnt buy the book on but I figured the best way to show my appreciation for the book was by giving my thoughts and 5 stars. Everything you need to know about PV is in the book and also has questions to study at the back of the book especially for aspiring contractors and installers.

Great book! I paired this with his other book, "Solar Photovoltaic Basics", in preparation for taking the NABSEP exam. Lots of great information!!

This book is hands down the best book for understanding what it takes to be a PV expert and for preparing for the NABCEP PVIP Exam.

This book is a must have for PV Solar NABCEP professional exam preparation. It is very well organized and explains all there is to know to pass the exam. It is the best PV Solar instruction guide I have read and I recommend it to all students and professionals in the Solar industry. This is the book we use as a guide for our study groups and training as well.

This is an excellent book for solar installers or designers looking to prepare for the NABCEP PV Installation Professional certification exam. We use it in two of our HeatSpring online courses, and the students find it invaluable in preparing the pass the exam.
