Customer Reviews

Okay, full disclosure. I'm a huge fan of Kelly Pfeiffer and her blog Nosh and Nourish. I have been following her for a while now, and I have made a lot of her recipes. What I love about the food that she shares is that they are original creations, they are flavorful and delicious, and they have healthy components as well. In her first actual "print" cookbook (she does have an e-book cookbook which I also highly recommend), Kelly focuses on recipes that incorporate one or more of the following superfoods: 1) Quinoa 2) Chickpeas 3) Kale 4) Sweet Potatoes 5) Blueberries 6) Eggs 7) Honey 8) Coconut Oil 9) Greek Yogurt and 10) Walnuts. She takes time in the beginning of the book to briefly explain why those ten items are classified as superfoods and gets you excited about using them. One of the first things you'll notice when flipping through the pages in the book is the pictures. They are fantastic! Don't be surprised if your mouth begins to water just looking at the pages. I know mine did! The book is broken down into the following chapters: 1) Superfoods and the Nourished Family (an introduction where she introduces herself and her family, tells her story, and teaches you about the superfoods you'll be using in the book. 2) Breakfast & Brunch 3) Appetizers 4) Soups and Salads 5) Sandwiches & Quesadillas 6) Main Dishes 7) Desserts. So as you can see, she has thought of everything. Within days of owning the book, my wife and I dived in and started cooking.

I have followed Kelly's blog for years now and was so excited that she was producing her own cookbook. It was refreshing to read as the recipes are not only delicious, but also focuses on simple easy ingredients that benefit the body with nutrient dense foods. Once I received my cook book I ordered the coconut oil and began to experiment with her recipes. You simply cannot get this book and resist planning recipes weeks in advance so you can try all of these yummy creations! So often I see cookbooks that attempt to deliver recipes to assist in guiding people to healthy ways of life. They fall short where Kelly succeeds in every way! Kelly organizes food by health benefits not by cutting things out or using all those "reduced fat/ sugar" (which everyone should just read as chemical S#@^ storm). That positive spin alone allows individuals seeking healthier lifestyles to view the adaptations you make as a positive rather than restrictive lifestyle. I enjoy thinking of the good things I can do to support my body from what I have learned in this cook book. I will undoubtedly begin my own experiments with the superfoods Kelly has shown me how to use. I & | my family & | and my house guests owe her our sincere gratitude for that change in our life. This cookbook takes regular recipes and breathes new life into them. Swapping out simple ingredients for healthier versions can sometimes be an overwhelming task. Kelly simplifies the process and makes the recipes exciting and new! Her smashed berry & balsamic kale grilled cheese is to die for. .. hands down AHHHH-MAZING ! And if you are having a party try the 7 layer greek dip (with a

nutritious base of quinoa!) or the equally delectable and nutritious kale & artichoke dip. I promise you your guests will have no idea they are eating healthy!!
