To order the Enhanced Pearson eText packaged with a bound book, use ISBN 0134057325. **Parents as Partners in Education** is the most comprehensive book on the market covering the history of family/school collaboration, current issues and population trends affecting American schools and communities, diverse family structures, and techniques for establishing connections with parents and encouraging involvement with their child's learning (PreK- Grade 4). Among other themes, the book emphasizes the importance of funds of knowledge for children's development and for effective partnerships with families (the knowledge that children acquire from their families). This edition also adds the concept of funds of identity as a catalyst for educators to understand their own identity. Throughout the book the authors make connections to these concepts not only to help educators understand child development, but also to show how children develop within the context of their families. This edition also continues to highlight important parent involvement programs and how such programs are often successful because of an asset-based view of families, particularly of those that are culturally and linguistically diverse, as well as those with children with special needs. The Enhanced Pearson eText features embedded video and assessments. **Improve mastery and retention with the Enhanced Pearson eText*** The Enhanced Pearson eText provides a rich, interactive learning environment designed to improve student mastery of content. This book was purchased for a college course. It was on the required book list. I purchased this as a used book and it was as described except for more wear was evident than was stated. Though the wear did not affect the book content. Was delivered quickly.

I had purchases this book for school and when I put it on my kindle the actually page numbers showed up which was great and it was very helpful for the class and I will probably continue to use it after the class is over

Had to miss some of my class assignment because it arived late and when i got the book, it had 3 different forms of hilights that made it difficult to concentrate while reading, i already felt bad for people who are going to rent it after me..

This was amazing! I loved renting from you guys, but I do need help, im new at , Im done with the book so how do I ship it back? I had it since September I believe and I think my time is almost up. THANK YOU GUYS! YOU ROCK!

This book has everything from parent involvement to parent teacher conferencing to the very best history of parent education/involvement that I have EVER seen.If you can't find any book by Kevin Swick, then get this one. Heck! Get 'em both! You can never do with enough ways to get parents involved with children during the early years.

This book is comprehensive and easy to follow. It is useful for understanding the various perspectives of both teachers and families. I think it is essential for new teachers, as well as those

who may feel the need to prioritize and start putting families and communication first![...]

I bought this book for a class and thought it would be one that would be relevant to my work with parents. There is only so much that can be said and then there is repetition or information that is far from necessary. I was assigned chapter 10, "working with parents of children with disabilities". Of the 42 pages 26 talked about the history and laws of special education. There was not really anything useful in the chapter that gave specific advise on working with parents. Some of the other chapters were child abuse and home schooling. Not at all what I expected.

1. Because overall the book was great. and it also arrived early which was very helpful.2. The book was in a good condition.3. I would recommend it to all the students in school.
