Math, Grade 3 (Interactive Notebooks)

Synopsis

In Interactive Notebooks: Math for third grade, students will complete hands-on activities about place value, multiplication, fractions, graphing, area, quadrilaterals, and more. The Interactive Notebooks series spans kindergarten to grade 5. Each 96-page book contains a guide for teachers who are new to interactive note taking, lesson plans and reproducibles for creating notebook pages on a variety of topics, and generic reproducibles for creating even more notebook pages. The books focus on grade-specific math or language arts skills and are aligned to current state standards.

Book Information

Series: Interactive Notebooks

Age Range: 8 and up

Grade Level: 3 and up

Customer Reviews

Neat supplemental book for my homeschoolers' educational career, each activity does take an entire class day, but I feel the activities give a concrete activity for the math subjects listed. This book has great intro.s to new concepts which can sometimes be a challenge.

I ordered this book for my Grandson after he had an assignment to develop an interactive notebook. In addition to being a great math tutorial it provided great insight into how to effectively create an interactive notebook for any classroom subject. I would recommend this to any Parent who assists their child with this type of homework.

Students are enjoying making their interactive journals and actually using them. So many times these activities are laborious and just look nice. These are easy to put together and student friendly.

Students like the activities sooo much and it gives a visual example of what is expected. Thank you!

I bought this to do with my 3rd grade class. I find that these hands on activities really deepen understanding. The instructions are easy to follow and the activities aren't complicated. Great deal!

Good for introduction to unit, but doesn't cover every math standard
