Customer Reviews

This review is rude, sorry, but I'm kinda angry after reading the book. It's elementary stuffs. Read like an online article without citations and reference material. I'm not getting much new information from it. I don't think it worth the price of \$3.99, and I actually wanted my money back...

Really good reading helping me out a lot with my criminal justice degree

A general introduction on criminal profiling in an indexing manner. Informative to beginners but too brief. It would be much better if could add some examples in detail.

For my Masters degree. Since I use it all the time and get A's on my papers I would recommend it to anyone. Any psychology class but especially my forensics psychology degree.
