I loved this book. It really provides the foundation you need to start intermittent fasting today. There are several things that are surprising with this type of diet. The first is that I always assumed that the hunger pains would be too strong. Though, as it turns out you can train yourself to not feel hungry during those periods. This also helps your body rebuild itself since there is no food in your body. It

makes the foundation for the pounds to fall off as the body burns the fat. Then, when you do eat your appetite is controlled and the total food you eat is limited. Wonderful resource here!
