Customer Reviews

There want much at all. It days cookbook, but it actually had more explain of the types of food and how to, but not very many recipes.

Way too short and too general. Not a recommended book, the only thing it really tells you to make is rice.

I am so glad I borrowed this for my Kindle. I was hoping for some more recipes. I can't wait until the end of the month to return it for a better informed book.

The book look fairly decent and the information is helpful, but it's not very well put together on the inside. Some pages have a single line of text at a random spot on the page and it's hard to read in those cases. Not very professionally put together.

Good foundation for creating "bento meals" but not many recipes. Would rate 5 stars with more recipes. Not bad for a dollar.
