# Visual Journaling: Document Your Life

## Synopsis

Visual Journaling is a new trend that combines planning, journaling and scrapbooking. It has become very popular to decorate planners and add tidbits and ephemera from day to day life. You can keep the 'planning' portion out of your visual journal and just concentrate on journaling with photos, ephemera and decorations. It's really up to you. This booklet discusses combining all the elements, as I do, into one book that documents everything happening in my life. So, read on to see how I do my visual journaling in some of my favorite planning systems.

## Customer Reviews

Literally a 5 minute read. Glad I have kindle unlimited. At \$5+ it's overpriced: 17 pages of listing example journals, journal supplies and some encouragement to journal visually. No substantive presentation of "how to" techniques and no photos of real world examples in the book. To her credit (the second star) the author links to her YouTube channel where she demonstrates using some journals. With more visual elements and more detailed description of techniques this could be a useful book (though not sure useful enough to ever break the \$2.99 price point). I really don't like

writing negative reviews but I really feel value-for-money is an issue here. Sorry, with the edition I read it's a \$0.99 book at best.

It was a quick read with a lot of information and links to various journaling ideas. Although it was information i was for the most part familiar with I found the perspective of the author interesting.

Nothing here you won't get from 5 minutes of youtube searching. Bummed I bought it without thinking past the pretty cover.

No new ideas. Just tells different kinds of published planners and links for purchasing. I did not learn anything new.
