## Customer Reviews

I learned by reading this book that wooden furniture shows the traditional status of a home and it is truly far contrast from another non wooden furniture. This book helps me to improve thought and in addition tips and advantages of wooden things. Wooden furniture conveys normal magnificence for a home and it is truly desirable over all noble people around the globe. It is important to get flawless wooden furniture for a home and make it beautiful and one of a kind to all. The expanded vicinity of engineered materials did not have an effect on the excellence and thankfulness individuals have for wooden furniture. Individuals having a rich taste of decision and style would never settle on purchasing manufactured hard board furniture. Wooden furniture gives a special touch of class in their advanced home style.

This book is simply a discussion of the superiority of wood furniture with no true comparison against other types. There are no photos to illustrate. Also, it reads as though the original manuscript was written in another language and then put through a transition program; unfortunately, the translation was not edited for syntax. It was so hard to follow, I gave up halfway through.

Done finished. There are plenty of books on this topic WITH SCHEMATICS AND HELPFUL TIPS. GUYS THIS AIN'T ONE OF THEM ^
