Adam Lynch has gathered the facts, the myths, the fears, and the solutions for that inevitable enemy, Hair Loss, and presents this information in a manner that is easy to understand, to grasp, and to follow the guidelines of presentation. The book opens with some informative facts and the plan the book will put forth the information: `Loss from sixty to one hundred hairs a day is considered a normal ongoing process and is an individual phenomenon: some people simply lose more and some people lose less hair, but when the loss volume is above normal that indicates that exists a problem to be solved. This problem has to be taken seriously, especially because for people of all races hair is one of the most important sociological and psychological characteristics. Have you ever thought how all those hair-articles and shampoos can influence your overall hair health? How the mass media is poisoning us with bad information and how the medicine can impact our financial status and health security? This book will cover basic issues and diagnoses of hair loss, and further, it will focus on how some of the medical supplements and therapies affect our natural metabolism stability.' IN an organized and informed fashion the book is divided into two parts and the table of contents tells us what we will learn. PART I - Hair loss: Genetic, Stress and Other Factors - Introductory Facts and Knowledge: How Does Hair Grow ?, What Leads to Hair Thinning ?, Causes of Hair Loss (spend some extra time here as there are some fine pearls of wisdom shared); Permanent and Temporary Hair Loss- Permanent Hair Loss, Temporary Hair Loss; Prevention and Delaying - Nutritional Supplements for Strong Hair, Herbal Shampoos and Lotions for Hair Loss; Men Hair Loss; Women Hair Loss.
