## **Customer Reviews**

Really couldn't believe how comprehensive this book was. It basically contains the same info you could learn in a \$1000 course on sales, but without all the boring lectures, covering everything from Maslow's hierarchy of needs to more advanced concepts like the chapter on "10 theories of persuasion you need to master". This truly is a handbook for selling, persuading, or, dare I say it, manipulating. Regardless of whether you would consider yourself good or evil, the truth is, if you want to skyrocket your influence on others, this book will definitely get you there.

This is a fantastic, detailed book for persuading just about anyone: friends, family, colleagues and even complete strangers. I love the way that the author provides in-depth explanations of each of the new concepts they introduce, so that you can fully understand everything. I feel that the information I've gained from reading this will give me a lot more confidence and will enable me to influence a wider range of people. I think it can do the same for anyone.

This book gives a basic outline of structuring your actions based upon assumptions of human behavior in order to produce a desired outcome. This appears to be geared toward a 'sales' perspective, but, arguably, persuasion is simply selling an idea. While it appeared extremely basic, it

will be good for some of those simple ideas to be spelled out for beginners. It is also thought-provoking about knowing yourself, knowing others, and trying to predict strangers. However, I would not recommend this book based on my personal style. This book is one of countless approaches to 'getting your way.' I docked 1 star for scattered writing. Some words were out of order in sentences and some parts were nearly cut-off. I docked 1 star for the abundance of information that required citations or references of some type. While I would usually let plagiarism in some forms slide a little, there were so many specific examples that deserved a cite in some form. I imagine the author was simply unaware, but when publishing a book either the editor or the small print presented when self-publishing should warn about this.

Being persuasive is not always easy to many people. Some people have it, but many don't. This book opened my eyes to different ways that I can do to be more persuasive. I actually tried one of the tips inside and it worked to my brother. I never tricked him before into doing what I want, but now, he gave it to me so fast. I highly recommend this book.

Happy to have read this book. This book gave an in-depth explanation on the core context of persuasion and I was persuaded by its explanation because its factual and realistic. The tips are great to be implemented and its something that I can use from time to time to gain more confidence in interacting with others. Helpful book and would surely recommend it.

Persuasion is a skill that can be learnt and mastered . The author of this book Hanif Raah , does an excellent job of explaining how you can get individuals to do what you want them to do . He goes through each chapter explaining how you can use your body and your words to influence persons into your way of thinking . He shows you how the subtle art of persuasion can help you to achieve your life goals , become more popular among your friends and more importantly increase your earning ability . This book is a must read if you want to achieve more from life .

What a silly book. Don't waste your time unless you're into grand proclamations. For instance, in the "What to Expect from Reading this book?" section, it makes claims like, "get what you want, when you want at home, work and anywhere else; live your dream life" Keep in mind that this is the introduction, but you're already 15% of the way through the entire book. Wow, 15% closer to your dream life already! Do you like exaggerated use of absolutes? "Persuasion is something you need every day, in every aspect of your life. You need persuasion skills to get your spouse [sic] do what

you want. You need persuasion skills to get your kids to do what you want... And the list can go on forever - your boss, your colleagues, your clients, your doctor, the salesperson, the fellow commuter, and so on."These are the genius nuggets you can expect to glean from this "book".

This is indeed a funny book. Thinking of the coolest way on getting what you want in your own WAY. Getting always what you want. This is a mind hacks with the combination of psychology and other Influences. A talent and a skill. Informative.
