# T-34-85: Camouflage And Markings 1944-1945 (Green Series)

## Synopsis

T-34 served in huge numbers with the Soviet Army and its allies, and was also used by their enemies! This book describes the colors and markings applied to the T-34-85 in service with all major users, including unit and tactical markings, individual names and insignia, and air recognition features. Profusely illustrated with photos and color profiles, this is essential reading for armor enthusiasts and modelers. REVIEWS "... a good overview of the development and combat history of the T-34-85.... the markings and camouflage section to be very interesting and helpful for the modeler who wants to depart from using the kit furnished markings. None of the markings are too complicated and can easily be replicated with a fine brush and a steady hand....the color illustrations helpful to get a "feeling" for what camouflage was used on T-34-85s. All of the photos are clear enough to use to provide additional detail to kit parts, with the identification of the various turret types being particularly helpful to take a modeler's work to the next level. I can truly say that I understand the various turret types of the T-34-85 after this review. The final word: I highly recommend this book for the library of fans of the T-34 tank, WWII modelers as well as post war modelers. The Armor Modeling and Preservation Society

## Customer Reviews

A nice combination of in service photos, color profiles and walk-round photos. Lots of color profiles showing markings for Russian, Czech, Polish, Finnish, Yugoslavian, and German captured

vehicles. Of course 4BO Green is most common for T34/85, but there are some examples of camo used by a few units. I really liked the walk-around section with clear photos of museum tanks detailing the differences between various factory turrets. A great addition to the library of any T34 fan.

highly recommended
