This is one professionally created children's educational book! I downloaded this book because my kids like to read a lot. I thought jokes would be a great way for us all to be interested in reading together. I found the jokes refreshing and the kids can understand and follow along just great. I was worried that they would not get the jokes, but the illustrations really help out and are wonderful. They are in the second and third grades and really interested in animals. My kids like to read to their friends when they come over. I find this funny because my kids were never interested in educational activities outside of school work. Now they want to do talent shows with everything we're learning and I am all for that. A great book to get your kids in love with reading.

I am a teacher and I got this book for my 3rd grade student. The cover picture of the book itself attracted her and later she was engrossed in it . This book helped her understand sight words which are very important and she also enacted the jokes . It made her curious about animals and I was more than happy to answer her questions which she kept asking me while reading the book. We had a very nice learning session filled with laughter. I was really amused to see her behave like certain animals while she was enacting . I will recommend this book to parents and teachers who want their kids to learn with joy.
