Material Innovation: Packaging Design

Synopsis

Explores new and innovative materials designed to change the way consumers experience product packaging The third in a series of ten volumes exploring the constantly evolving frontiers of design, **Material Innovation: Packaging Design** presents products whose packaging reaches new heights of innovation. The range is diverse and international, from âœplantableâ • packaging that can be buried in dirt after consumer use, later to emerge as a plant to alcohol bottles with labels that react to music, and bespoke, collectible jars of Marmite XO. **Material Innovation: Packaging Design** explores not only the latest advances in consumer product packaging but also how such advances could fail or flourish within the increasingly digital landscape of the twenty-first century. Case studies featured throughout the book profile the innovative use of materials by a particular practitioner, practice, or company, offering specific and elegant solutions. Clearly structured and illustrated throughout, this book will connect reader (whether student or professional) to material. 350+ illustrations
