It seems that a writer just has to attach something about cancer or weight loss to a health book and readers will be attracted. But most of these books are put together from many sources by a researcher/writer with little knowledge in that particular health field. However, this short book still could have a lot of value. This book meets that criterion. "Look for food that is good for your immune system and will aid your body in its fight against cancer cells." That's true--even though that food itself may not cure the cancer. However, what might help your body reverse cancer can help your body prevent cancer. That's the key!The author covers fresh fruits and vegetables, whole grains (some debate on that these days), salmon, beans, olive oil. etc. Yep, the antioxidant regimen. Then

she gives us a number of recipes--for breakfast, lunch, dinner. "Cancer...depletes your body of its strength and nutrients. Replenish with these anti-cancer... recipes." These recipes sound delicious and worth considering. But keep in mind that often cancer cannot be cured with food alone. Yet lifestyle improvements are crucial to give a patient the best chance. A good, brief introduction to better foods and recipes for better health. I recommend it as a good introduction to a total lifestyle that could fight many kinds of diseases.

Great simple recipes that are super healthy. Backed by proven research and studies the foods in these recipes are strong cancer fighters. This cookbooks focus is on health and anti-cancer. We have made about five or six recipes so far and I found them simple and delicious. If you're looking for a natural healthy way to build your natural defenses this book is for you. Highly recommended!
