Medical Magnets: Saving Lives And Millions Of Dollars In Health Care: Why Your Insurance Plan Should Pay For Medical Biomagnetism (Alternative Solutions Book 2)

Synopsis

Now that in the USA we are mandated to carry medical insurance, it makes sense to have access to the finest health care available. Every healthcare consumer must understand that even the World Health Organization (WHO) recognizes the allopathic medical system is losing the battle against certain infections that once upon were easily treated with antibiotics. Humanity as a whole is discovering that the solution to our health problems are not found in medications, surgeries and exams. The statistics point out a grim reality about the current medical system, for example, you are more likely to be killed by a medical doctor than to be killed by a gun. That, without a doubt, is an alarming fact. With the discovery of Medical Biomagnetism, we have found a safe and natural solution that can improve the current medical system by adding this safe, natural and effective solution. By doing so we will transform our healthcare system into one of the finest in the world. In 1988 a physician discovered that the strategic placement of magnets to the body can have a direct effect on correcting potential hydrogen (pH) distortions. This is very important because most disease is directly related to our organism's biochemical balance. In a pH neutral environment disease cannot exist. Time is proving that this medical system does in fact work. This book is about informing ourselves, taking action, and getting results. Improving a failed system happens when we take action. Congratulations for adding this book to your library! This books is about how to get the insurance industry's attention in order to move closer to having them pay for this magnetic medicine that without a doubt every person of the world deserves to have. When the insurance industry begins to receive requests for this therapy, we take one step closer to making this effective therapy accessible for all. This is a solution that benefits not only the patient, but the insurance industry as it would translate to economic savings.

Customer Reviews

Would not even give it 1 star ... have never rated a book before, however this one is ridiculous, totally non-informative rant about how great this guy is and how he should be paid more by insurance he is totally naive in regard the economic debt system and basically an ignorant individual asking you to pay for his self promotion ... if he really is called Moses, it is a pity the sea did not end it's parting while he was in it. Waste of time and money and does not enhance any +ve aspects of human nature
